VoIP telephone numbers will be assigned randomly from a pool of immediately available USA North American numbers unless specified below. VoIP numbers can be requested that are guaranteed to be a local call from any USPS verified delivery address.

Yes, I want a VoIP number that is local to this verified USPS address:

Note: Address above MUST be verified using the USPS database: <http://zip4.usps.com/zip4/welcome.jsp> - unverified addresses will be rejected.

NOTE *All New Internet Service Activations Require a Provisioning/commissioning/network operations installation support charge of \$99.00

NOTE There is a One-Time Setup Charge of \$50 for any Freedom service plan that includes VoIP service, toll-free numbers are available and require a \$100 Activation setup charge. Local and/or toll-free numbers take 3-4 weeks to provision.**

The service is designed to provide access to the public internet, primarily for web browsing and email. Certain applications like VoIP, teleconferencing, and streaming media are designed to use a constant amount of bandwidth, and as a result consume more network resources than normal Internet access. By purchasing a minimum CIR (Committed Information Rate) in addition to the standard bandwidth, you will insure the highest quality when using these applications.

The VoIP service plans above include CIR, so you will not need to purchase any CIR to use VoIP on these Freedom VoIP plans. Use of any additional VoIP lines or any of these other applications without CIR is a violation of the Terms of Service, and will result in suspension of service and/or additional charges.
