VoIP telephone numbers will be assigned randomly from a pool of immediately available USA North American numbers unless specified below. VoIP numbers can be requested that are guaranteed to be a local call from any USPS verified delivery address.

Yes, I want a VoIP number that is local to this verified USPS address:

**NOTE \*All New Internet Service Activations Require a Provisioning/commissioning/network operations installation support charge of \$99.00**

**NOTE\*\* There is a \$50 activation setup charge for all VoIP lines. Toll-free and/or specific local numbers are available and require a \$100 activation setup charge. Local and/or toll-free numbers take up to 3-4 weeks to provision.**

The service is designed to provide access to the public internet, primarily for web browsing and email. Certain applications like VoIP, teleconferencing, and streaming media are designed to use a constant amount of bandwidth, and as a result consume more network resources than normal Internet access. By purchasing a minimum CIR (Committed Information Rate) in addition to the standard bandwidth, you will insure the highest quality when using these applications.

The VoIP service plans above include CIR, so you will not need to purchase any CIR to use VoIP on these Business Basic VoIP plans. Use of any additional VoIP lines or any of these other applications without CIR is a violation of the Terms of Service, and may not work, and could result in suspension of service and/or additional charges.
